

As previously announced, STAT-USA with the assistance of GPO is assigning new passwords for access to depository accounts to STAT-USA.

All libraries MUST review and update their contact information that is in the Federal Depository Library Directory (FDLD) by January 23, 2009. If your library's information is not updated, your library may not receive its new STAT-USA password.

Please note the following:

- To update your FDL D account, log into the [Library Directory](#) .
- When updating your FDL D account, pay particular attention to the depository coordinator's email address. The new password notification is being sent to each depository's coordinator during the last week of January.
- Do NOT share the reissued STAT-USA password with anyone outside of the library staff.
- If your depository has IP authenticated access to STAT-USA, this action does not apply to you.

For more details, please read our [previous announcement](#) .
